**b. KYTC 4-Year Target Revisions – presented by Pam Drach**

The 2-year and 4-year performance measure targets for Pavement, Bridge and System Performance, along with other federally required targets, were originally approved by the EMPO Policy Board on November 10, 2022. KYTC has opted to revise the targets as shown:

	Kentucky - Previous		Kentucky - Revised	
	2-Year Target	4-Year Target	2-Year Target	4-Year Target
Interstate System - % of pavements in Good condition	n.a.	50%	55%	60%
Interstate System - % of pavements in Poor condition	n.a.	3%	4%	3%
Non-Interstate NHS System - % of pavements in Good condition	35%	35%	35%	40%
Non-Interstate NHS System - % of pavements in Poor condition	6%	6%	6%	5%
% of NHS Bridges, by deck area in Good condition	35%	35%	31%	27%
% of NHS Bridges, by deck area in Poor condition	3.7%	3.2%	3.7%	3.6%
Interstate System - % of person-miles traveled that are reliable Level of travel time reliability (LOTTR)	93%	93%	95%	93%
Non-Interstate NHS System -% of person-miles traveled that are reliable Level of travel time reliability (LOTTR)	n.a.	82.5%	91%	91%
Interstate System - Level of truck travel time reliability (TTTR)	1.25	1.25	1.3	1.35

At this time, the Evansville MPO is recommending the adoption and support of the KYTC revisions to the statewide targets as listed.

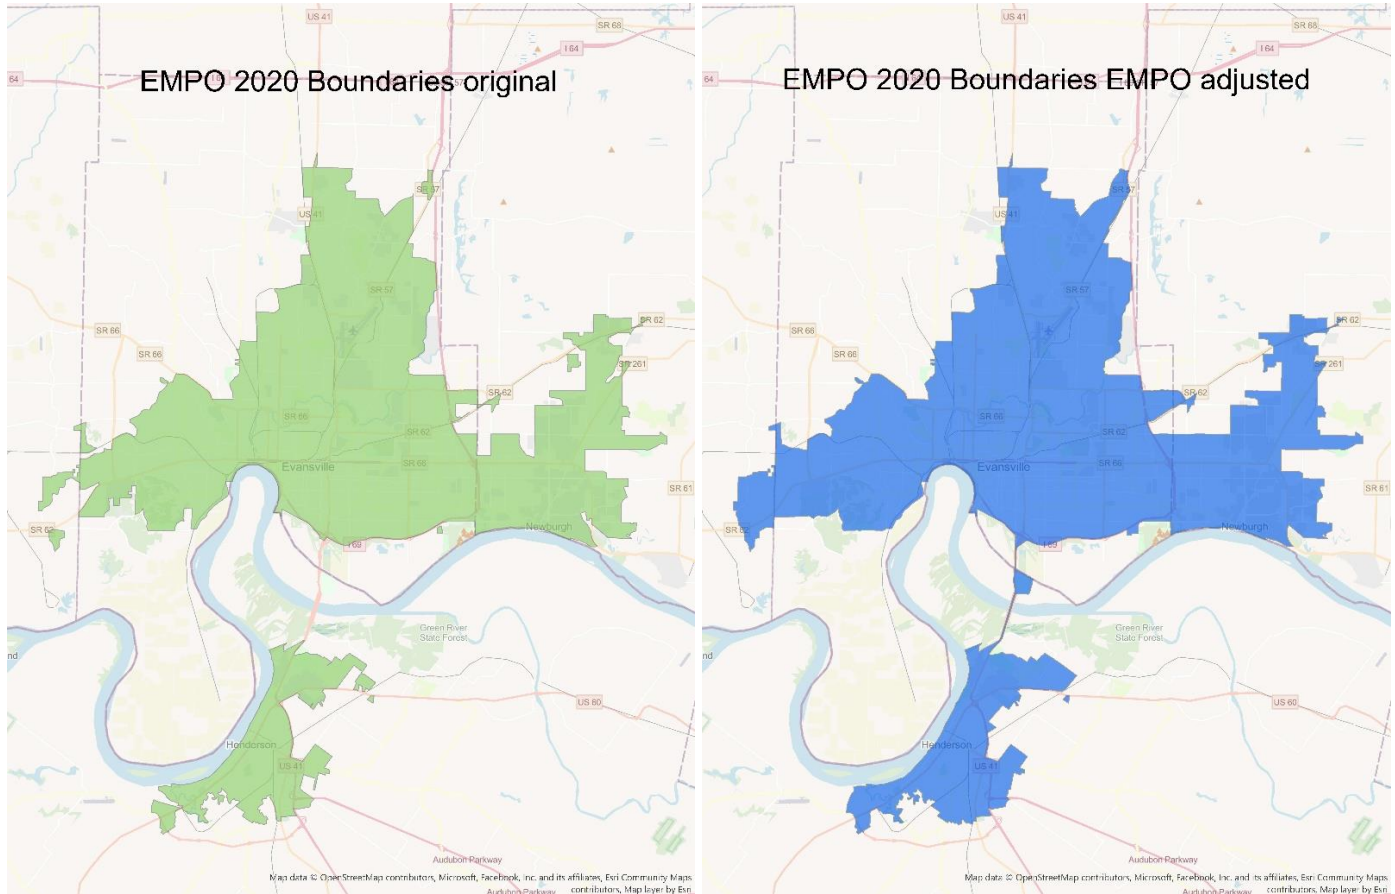

*Shawn Hayden made a motion for approval and David Broderhausen seconded the motion; motion carried.*

**c. Evansville – Henderson Urbanized Area Boundary Adjustments – presented by Matt Schriefer**

For each decennial Census, the U.S. Census Bureau revisits the regulations for developing urban area boundaries. Changes in regulations for the 2020 Census led to modifications of urban areas across the country. The Evansville MPO region received a map of those changes in the fall of 2022.

After receiving the map, the Evansville MPO conducted several meetings with local, State and Federal partners to discuss and review the 2020 Census Bureau designated urban boundaries and the appropriateness of the Census boundaries to the transportation planning process. The Census defined boundaries for 2020, developed for statistical purposes, separated the Evansville urban area and the Henderson urban area into two separate areas. This reflects a change from the single urbanized area that has been in place since the 1980s. Regulations provide an opportunity for local and State agencies to fix and/or adjust the Census defined areas as part of an adjustment process and submit and adjusted area to FHWA for consideration.

Based on the rules and guidelines presented by the Census and FHWA, using additional publicly available data from federal agencies, including FEMA and the U.S. Army Corp of Engineers, and utilizing current aerial photography and local knowledge, the MPO recommends that the adjusted urbanized area boundary submittal provides appropriate expansion and supports the continuation of a single Evansville-Henderson Urbanized Area for planning and funding allocation.

*John Petkovsek made a motion for approval and David Broderhausen seconded the motion; motion carried.*

**d. Vanderburgh County Safety Action Plan and Warrick County Safety Action Plan – presented by Brooke Vorbeck**

The Bipartisan Infrastructure Law established the new Safe Streets for All Discretionary Program. This program funds regional, local, and tribal initiatives through grants to prevent roadway deaths and serious injuries. The program requires an approved Safety Action Plan to apply for Demonstration or Implementation Grants. The Evansville MPO has prepared Safety Action Plans for both Vanderburgh and Warrick Counties. Henderson County developed their own Safety Action Plan last year and GRADD was awarded a grant through the program to create a Safety Action Plan that will include the City of Henderson.

The Evansville MPO is committed to prioritizing safety in order to reduce the risk of death and serious injury that result from incidents on transportation systems in the region. The plans identify locations on the local road network that have experienced high crash rates and crashes involving fatalities and incapacitating injuries and outlines strategies to help achieve FHWA’s Zero Deaths Vision. The data was analyzed at a countywide level using the 2016-2020 Indiana Crash Database ARIES. This countywide level analysis was completed to determine locations that should be considered as focus areas. Additional detail and analysis are recommended beyond this countywide level plan for location specific crash analysis.

Stakeholder outreach included surveys and meetings in each county. Stakeholders included representatives from various city/county government agencies, law enforcement, fire departments, and emergency management agencies. Freight carriers were also engaged with a survey. State roads and intersections with state roads were not evaluated as part of this plan. Any comments that were received during the process on state roads were forwarded to INDOT and INDOT was also present during the Stakeholder meetings.

The Vision of the plan is to establish a safety focused culture that promotes and implements Toward Zero Death strategies.

The goals of the plan include:

- Encourage Implementing proven safety solutions systemically to reduce fatal and severe crashes.
- Improve the safety and security of the transportation system for all users.
- Support the INDOT state performance targets and their goal towards reducing fatalities from 862 in 2020 to 550 in 2042.

The approval of these Safety Action Plans will allow the local government agencies to apply for a Safe Streets for All (SS4A) Demonstration or Implementation Grant.

*Nate Hahn noticed that the breakdown of types of crashes did not include anything for distracted drivers, and asked for confirmation on that. Brooke explained that distracted driving is included in the plan as a primary factor, but it was not part of the Top 5 that showed up on the lists. Thomas Witt asked if the plan included any specific improvement concepts at identified crash locations, or if the plan included general countermeasures that could be applied anywhere. Brooke explained that the plan includes general countermeasures and strategies. Because these plans are on a county-wide level, additional analysis would have to be carried out for specific locations and improvement concepts. Thomas followed up by asking if the additional analysis is something that could be done through a future grant that may be applied for once this plan is approved. Brooke confirmed that is the case.*

*Lorie Van Hook made a motion for approval and Shawn Hayden seconded the motion; motion carried.*
