

Executive Summary

Introduction

The Evansville-Henderson metropolitan area continues to experience population and economic growth, increasing demands placed upon transportation networks in our region. It is the job of the metropolitan planning organization, or MPO, to conduct a transportation planning process that will accommodate the transportation need of residents, businesses and visitors.

The Evansville Metropolitan Planning Organization (EMPO) *2010-2013 Transportation Improvement Program (TIP)* provides an ambitious schedule of transportation improvements that will both enhance the current system and provide for future growth. In addition, the overall program is designed to contribute to the area-wide goal of cleaner air. This program includes improvements to the system of roadways, transit, bridges, and bicycle/pedestrian facilities.

Total Cost

The total cost of all projects and programs included in FY 2010-2013 is \$286 million, of which \$170 million will be federally funded, \$73 million will be state funded, and \$43 million will be locally funded.

Evansville MPO 2010 - 2013 Transportation Improvement Program (TIP): Program of Projects

projects	ID#	2010	2011	2012	2013	illustrative
